every day with wisdom, somewhere giving a meal to the less fortunate. Members of Florish Lions Club are totally committed to this cause and believe in serving food - whether it is an old age home, a nursing home, or through the mobile food van parked by the roadside.

**Paradeep, the Bapna project**  
of District 3231 is a structural community kitchen equipped to prepare over 1,000 meals every day. That's an astounding 3,60,000 meals annually. The operation is efficiently facilitated by a team of three vans, including one for distributing meals, another for food, and a third one equipped with waste facilities. The district aims to expand the reach of the project and much more over Year 10 to the year to come.

**The Anandita project of Malda New Century Lions Club (District 3220)** was inaugurated by International Second Vice President A. P. Singh on January 21, 2023. Since then, the project has served over 5,000 meals through 15 food drives.

On a mission to deliver nutritious meals to those in need, the Anandita team transports meals to rural and primary schools, reaching out to underprivileged students and elderly individuals without proper care. Currently, food is served twice a week. However, the

club aims to provide daily nutrition. Additionally, weekly trips are made to the most isolated regions, addressing malnutrition among children in rural villages. This initiative has expanded across District 3220, inspiring other clubs to support it by connecting with, educating their teams and skills or organizing their own programs to eradicate hunger in their communities.

#### MD 3231

Pink Beti Daptra ki is a journey of compassion. One that began on July 7, 2019, with a simple yet profound idea, "No one should go to bed hungry." At its core, this idea embodies the shared culture – a commitment to caring for the less fortunate in our society.

The club has also installed more sinks and filters or gift bands and wheelchairs, conducted health awareness camps for mothers and newborns, conducted dietary and menstrual hygiene programs for young girls, developed sanitary pads, and set up the Toilet in School, Society, where 'Ms. Sandalp' beauty pageant has provided a platform for married women to showcase their talents.

It began as an awareness campaign in the villages of Chaudhurikhedi and Sauri in Gujarat, and in the rural areas of Maharashtra. The club not only educated women and girls about menstrual hygiene, but also provided free biodegradable sanitary napkins and information on the nearest places where they could access the pads regularly. With support from various organizations, the club has conducted campaigns in 32 states.

The newly formed Sandalp Kondli Lions Club, of District 322C2, rechristened on their service journey with a beautification project; they facilitated the parasite of 30 baby girls born during Navratri at the Sandalpuri District Hospital. The club gifted these baby kits and fruits, setting a beautiful example of celebrating a girl child in a society that often undermines them.

One of the most notable projects of the all-women Sandalp Sila Lions Club of District 322C2 is the 'Each One Teach One' program, with members taking responsibility for the education of one girl. Launched in 2015-2016, it has over time, evolved into a permanent project providing scholarships to underprivileged girls for college education.

**MD 3231**  
In a harsh reality that millions of women and girls in India lack access to safe menstrual hygiene products, endangering their health, curtailing their education and putting their livelihoods at risk. This is especially true in rural communities. Bombay Churchgate Lions Club of District 3231-A1 decided to address this challenge in 2020.

Over the last three years, Bombay Churchgate Lions Club has helped over 4,300 women and girls manage their menstrual cycle in a dignified way.
